Subject: RE: Inquiry on CFAC investigations

I kind of guessed that was where you were at in developing your sampling approach and I think conveying your decisions to Personal Matters / Ex. 6 is great.

Thanks for your good work on this project.

Thanks Julie:

I'm hopeful that we'll start working on prioritizing pathways and sample locations in the next few weeks. After we get an idea of what the scope of the investigation will be, I'll reach out to Personal Matters / Ex. 6 and discuss with her our sampling approach and whether or not it would/could include sampling in her area.

Let me know if you have any concerns regarding this approach. Thanks for passing this along!

Thanks,
Rob

Rob: I received phone call from a woman who lives outside of Columbia Falls up Teakettle Mountain. She read about EPA's planned investigations at the plant. She has concerns about historic air emissions from the plant up to her side of the mountain. I said you were doing the background research on past plant activities and other environmental data collection. If you could contact her when you get close to starting site work, she would appreciate some communication.

Personal Privacy / Ex. 6

Thanks!
